

Fast, Clear, and Reliable Carbon Management

碳管家

CarbonKeeper

All-in-One

Carbon Management Platform

Built for Enterprises

CarbonKeeper integrates data collection, carbon calculation, and evidence management into one streamlined workflow — reducing manual effort while improving the accuracy and consistency of carbon data.

Transform carbon management from a reporting obligation into a traceable, scalable, and continuously optimized capability.

Three Core Modules

Organizational
GHG Inventory

Collect, calculate, manage and report organizational greenhouse gas data.

Product
CarbonFootprint

Manage data collection and calculation for product carbon footprints.

Supply Chain
Management

Flexible forms to gather supply chain emissions and other ESG data.

Proven Results

Improvement in data
collection efficiency

90%

Improvement in
calculation
& report output

SYSTEMATIC MANAGEMENT Reduces Human Error
and Enables Precise Decarbonization Decisions.

Core Values & Advantages

01 Improved Communication

Streamlines cross-department collaboration.

02 Streamlined Verification

Detailed calculation worksheets ease third-party assurance.

03 Time Savings

Automated calculation and report generation.

04 Simplified Data Collection

Supports diverse data import methods.

05 Greater Data Reusability

Enter once, apply everywhere — no duplicated effort.

06 Higher Management Efficiency

Visual analytics to understand and manage emissions.

Key Features

Flexible Data Collection

Supports custom forms, AI recognition, system integration, and bulk Excel import.

Configurable Calculation Formulas

Customizable formulas for electricity allocation, calorific value conversion, and municipal waste calculation.

Streamlined Auditing

Transparent worksheets — every activity record is fully traceable.

Built-in Emission Factor Library

Integrates Ecoinvent and other major global factor sources.

Flexible Reporting

Freely choose gases, GWP version, boundary, and scope.

Multi-format Report Output

Generates report documents in multiple national languages.

Standards & Compliance

ISO 14064-1

ISO 14067

GHG Protocol

Recognized & Trusted

Trusted by 100+ Companies

Across 25+ Industries

Finance & Insurance

- Hua Nan Financial Holdings
- Taiwan Cooperative Bank

Tech & Electronics

- Micro-Star International(MSI)
- Wistron NeWeb Corporation
- AmTRAN Technology Co

Medical Institutions

- Taipei Hospital

Automotive & Manufacturing

- China Motor Corporation
- Sanyang Motor Co(SYM)

Aviation & Travel

- EVA Air
- LEALEA Group

Food & Retail

- FamilyMart
- Mercuries F&B
